Sponsor Spotlight

BeaconMedæS is a leader in medical gas and laboratory gas systems. Within the medical gas market, we specialize in NFPA and HTM-ISO standard products such as medical air systems, medical vacuum systems, WAGD plants, manifolds, monitoring equipment and pipeline components. We assist our customers with exceptional technical support and customer service to maintain our name as one of the world's largest medical gas service providers.

Getting worthwhile medical gas and vacuum system education for your maintenance staff is always a challenge, often requiring travel and losing them for a few days. It's great experience for them, but a challenge for you.

BeaconMedæS is offering some help. They are now offering medical gas training for maintenance, inspection and soon for clinicians. The courses can be taken individually, used as part of an inhouse training program, or taken all together and lead to an ASSE 6040, 6005 or 6020 credentials. They are available On line, at your site, or at the factory. As BeaconMedæS' representative for the Pacific Northwest, please contact Courtney and Nye at 503-693-1221 for more information, or visit www.myMedGas.com for details.
